

	UNION CENTER FIRE COMPANY INC. Best Operating Guidelines	
	Subject: Utilities	BOG Series Operations
		Initiated 01/01/04
Approved: Fire Chief Chris Hoyt	Revised 03/02/13	

At all incidents that require the electric or gas disconnected from a structure, NYSEG will be requested. When possible, the firefighters can turn off the gas at the supply meter, and electricity should be shut off at the MAIN BREAKER in the breaker box. DO NOT shut off individual breakers as this may hamper investigation team. Members **DO NOT PULL METERS.**

Any time there is a hydrant being used during an incident; Broome County Communications will contact Endicott Water, and advise them of such.
