Power Saw Operations Pt 1

Changing Blades & Chains

Using the power saws on your apparatus, remove and replace the chain or blade simulating operations that you would take in an emergency.

- Where are the spare blades or chains kept?
- What tools are required to change the blade or chain?
- What safety checks should be taken before using the saw after changing blades or chains?

- Discuss the uses of the different types of blades or chains that you may have on your apparatus. (if other types are available)
